

USFWS Response to the WY 2010 “OCAP” Review Panel

“OCAP” Integrated Annual Review
November 8-9, 2011

Recommendation:

- Timely incorporation of results of turbidity study
- Adjust criteria for implementation of Action 1
- Adjust Action 1 OMR to match winter pulse

Response:

- Smelt Working Group coordinated with turbidity study P.I.s
- SWG monitored and considered additional turbidity station data
- Does appear consistent with intent of Action

Recommendation:

- Improve clarity of USFWS' Determinations
- Improve OMR compliance process
- Link RPA Actions with DSM vital rates

Response:

- We had planned on it, but –no Determinations!
- USFWS staff continue to work with NMFS & Project Agencies to develop an integrated protocol
- Continued support for DSM life cycle model
